

Prediction Model Protocol Fixture

Researcher One¹ & Researcher Two^{1,2}

¹Population Health Centre

²Open Methods Institute

Background: This synthetic protocol represents a prediction study.

Methods: The fixture exercises metadata, tables and section geometry.

Keywords: prediction, protocol, reproducibility

Protocol version 0.1

1 Background

The study develops a prediction model using reproducible methods [1].

2 Methods

The analysis includes:

- 1. prespecified predictors;
- 2. internal validation; and
- 3. calibration assessment.

Construct	Representation	Policy
Age	Continuous	Authored
Outcome	Time to event	Authored

2.1 Wide analysis table

Model	Development	Validation	Calibration	Reporting
Base	Full cohort	Bootstrap	Flexible curve	Full equation
